- HIBISCUS** (Marshmallows)—5 to 6 feet. July to September. Immense saucer-like blooms in separate colors of red, pink, white. 35c each

Bright Spot Gardens

GERMAN IRIS—We grow a stock of moderately priced Iris, in a good range of colors, all of which would grace any garden. A low price does not necessarily denote cheap varieties. High prices mean newer varieties which are still scarce and not perhaps any more beautiful.

As all our German Iris was lifted, divided and reset in 1931, it is impossible to say if all will bloom in 1932, but all varieties, of which we have a large stock, will be sold until August 1st, at greatly reduced prices, that is, we will give two rhizomes for the list price of one. After August 1st, prices will be as listed. The varieties marked (*) are not included in the price reduction.

S stands for Standards; F for Falls.

- ALBERT VICTOR—S soft blue. F lavender. 40 inches. 25c each
- ARNOLS—S rosy bronze. F velvety purple. 30 inches. 35c each
- BLUE BOY—S and F rich purple, beard blue 15 to 18 inches. Early. 25c each

We carry a variety of small plants suitable for miniature gardens including *Crassula Arborescens*, the small-leaved rubber plant, small-leaved English Ivies, the various *Sedums*, small ferns and other plants.

We also have material of many kinds for terrariums, the enclosed glass bowls or boxes which afford the moist atmosphere required by shade and moisture loving plants, and make it possible to bring bits of our gardens into the living room.

After May 15th, we will have pots and baskets of well established blooming plants for Memorial Day. We also fill to your order, your own containers.

We suggest that we can do much better for our customers if their orders are given and selections made as early as possible before stocks are depleted and the rush of Memorial Day business is at its height.
